

ENVIRONMENTAL CREATIVITY

Using the coast, the seashore and natural woodlands for

REOPENING CHILDREN'S CREATIVE MINDS

Children are naturally curious and creative and our Environmental Creativity Programme was designed by our own team who show exceptional talent in working with all ages of school children and of whatever academic ability. This innovative programme offers a hands-on approach to build and develop a variety of skills within the group, stimulating an interest in the environment and awareness of our interaction within it. We use many different materials with an emphasis on where they come from and their sustainability. Each day ends with a sense of pride and achievement as children and adults re-connect with the simple wonders of nature.

PROGRAMME MODULES

- A chance to live on **the wild side** creating **fires** and learning how simple life can be.
- Connecting with woodlands creating **tree paintings** and **hangings**.
- An introduction to a variety of **traditional skills** such as **dry-stone walling** and weaving.
- An exploration of the local area and a journey through its stories and mysteries.
- Beach art and sculptures using natural objects

What did you like?

"Rock pooling was just the best"

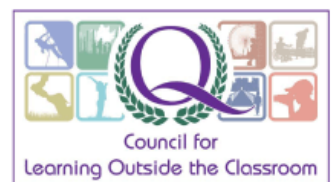

"I loved making collages with nature"

"The holistic nature of the activities and the links between each day"

"The quieter children came out of themselves and had a chance to shine"
